

ניתוח ועיצוב מערכות תוכנה - עבודת הגשה 1

מגישות: בר בוסאני 325356897, הדר ינאי 214254708.

1. דרישות המערכת:

ID	Module	FR/NFR	Desc	Priority	Risk	Status
1- נתונים	HR	func	The system will store the following details for each employee: employee ID, name, bank account number, employment start date, employment type, salary type, salary amount, vacation days, employment status	MH	low	
2- נתונים	HR	func	The system must allow only the HR manager to manage employee records, including adding new employees, updating existing employee details, and viewing employee information	MH	low	
3- נתונים	HR	func	The system must keep records of employees who are no longer employed	NTH	low	
4- הגשת משמרות	HR	func	The system will allow employees to submit constraints indicating which days and hours they are available to work for the upcoming week.	MH	high	
5- הגשת משמרות	HR	func	The system should allow the HR manager to set a deadline for employees to submit their availability.	NTH	low	
6- הגשת משמרות	HR	func	The system will assume that employees are available for all shifts unless constraints are submitted.	NTH	low	
7- הגשת משמרות	HR	func	The system will allow employees to submit preferences for the upcoming week, indicating: willingness for double shifts and a preferred day off.	NTH	low	

8- שיבוץ	HR	func	The system should allow double shifts only for employees who have requested them in their preferences.	NTH	high	
9	HR	func	The system should track which roles each employee is certified to work. Only the HR manager is authorized to add or change these certifications.	MH	high	
10	HR	func	The system will allow the HR manager to assign shifts to employees.	MH	high	
11	HR	func	The system will document the history of all shift assignments	NTH	low	
12	HR	func	The system will ensure a manager will be selected for every shift	MH	low	
13	HR	func	The system must allow the HR manager to define the required roles and the quantity of employees needed for each role per shift.	MH	high	
14	HR	func	The system must ensure that employees are only assigned to roles they are certified.	MH	low	
15	HR	func	The system will support 2 types of shifts: morning and evening shift	MH	low	
16	HR	func	The system should ensure employees are only assigned to shifts that match their constraints. If no other employees are available for a role, the manager may manually override an employee's constraints using a special approval, which requires the employee's consent."	MH	high	
17	HR	func	The system will allow only shift managers to take on another role in a shift.	MH	high	

שאלות פתוחות:

#	Topic	Issue	Significant Change	Client Answer
1	Employee Availability	What happens if no certified employee is available for a specific role in a shift?	v	The system should keep searching for a match. If an employee's constraints cannot be met, the manager can still assign them to the shift using a special approval. We can assume there are enough employees to cover all roles.
2	Multi-Role Assignment	Can an employee perform two different roles in the same shift?	v	Only the shift manager can take on another role in a shift.
3	Minimum Staffing Requirements	Is there a minimum number of employees required per shift?	x	Only a shift manager is required.
4	Employee's details	Is it possible to add a new employee, delete an employee, or update existing details?	v	Yes, but only the HR manager is authorised to do so.
5	Availability Submission Method	Who is responsible for submitting employee availability into the system? What is the availability's format - list of available days and hours or per shift?	v	The employee submits constraints for next week's shift scheduling. The default setting is that the employee is available to work any shift. list of available days and hours
6	Shift Change	Is it possible to change an existing assignment?	x	Yes, but only the HR manager is authorised to do so.
7	Shift Swapping permission	Is it possible for employees to exchange shifts with one another or is only the HR manager allowed?	v	Yes, but only the HR manager is authorised to do so.
8	Shift Duration	What is the time range for each shift (Morning/Evening)?	x	Yes. The morning shift is between 6:00 and 14:00, and the evening shift is between 14:00 and 22:00.
9	The Role Catalog	What are all the possible job roles in a shift?	x	The possible job roles are: cashier, shift manager, warehouse. There can be more in the future.

10	System Capacity	Is there a maximum number of employees that the system needs to support?	v	No, there is no limit.
11	Data Retention Policy	How far back should the shift history be preserved?	v	All shift history must be preserved.
12	Shift Staffing Requirements	Does the HR Manager define the required roles for each shift individually, or is there a fixed template for Morning and Evening shifts?	v	The HR manager must manually define different requirements for specific shifts.
13	Employment Terms	What are the employment terms details that must be saved for every employee in the system?	v	The details of the terms of employment are: start date, scope of position (part-time, full-time), global salary, hourly wage, and vacation days
